

Dear FCC:

In response to The National Association of Broadcaster's attempt to put through petition 04-160, I would like to offer my EXTREME disapproval of this petition. This is nothing more than a shameless attempt on the part of local radio conglomerates to prevent alternative sources of radio from coming into the market and offering TRUE ALTERNATIVES to the tripe that the conglomerates currently offer. In reaction to these poorly programmed, tasteless stations, I have recently discovered XML Satellite Radio, which provides me with quality listening 24 hours a day, 7 days a week. I absolutely love the satellite radio, and implore you to reject this petition in favor of suggesting to these radio conglomerates that they follow what any other creative entity does when faced with competition: THEY TRY SOMETHING NEW AND DIFFERENT. This petition is nothing more than an attempt to justify the lazy behavior of these broadcasters, as they continue to broadcast content that sounds exactly the same, from city to city, state to state, across the nation. XML Radio is our only alternative to this horribly ridiculous situation. DON'T LET US DOWN! YOU WORK FOR US! Thank you.
